Core Competencies

CreOwn Technologies provides software development outsourcing services. During our more than 10 years of being in operation we have been involved in projects dealing with many areas of IT, Below are the core competencies

- **Web application development** –We provide a range of web application development services from simple content web site applications to complex internet applications. We provide the best service for custom software development, CMS, E-Commerce website development.
- **Mobile application development** – We provides comprehensive services to meet this growing demand created by mobile technology through creative and customized mobile application development services. Our mobility services extent to mobile application development for iPhone, Android and Windows
- **Software Testing and Quality assurance** – CreOwn Technologies, a fast growing software development and quality assurance company has been providing a full range of s/w quality assurance and testing services.
- **Digital Marketing Services** – Increased communication for organizations fosters brand awareness and often improves customer services. We can establish your brand on the major social media platforms and enable you to interact directly with the customers.

Core Competencies

- **Project management services** – We provides project management services and responsible for many things such as monitoring the performance of the team, deliveries of the project, satisfaction of audience, end users, internal customs, stakeholders, meets all of its goals etc.
- **Staffing and recruitment** – We help our clients their IT staffing requirements and to get value for them from the staffing process. Integrated staffing solutions including temporary, contract staffing and direct hire to meet our clients evolving IT needs and priorities.

Business Models

There are total 4 different business models we are following:

- **Offshore development with dedicate team** – CreOwn offer dedicated offshore development center services to customers who are willing to set-up their own, dedicated offshore facility as an extension to their own capability and infrastructure with their own control.
- **Fixed price approach** – This option involves fixed price approach to development based on detailed specification and would be ideally suitable for situations where you want to outsource a complete project/product development for a fixed price.
- **Dual shore delivery** CreOwn leverages the advantages of using a dual shore delivery model to deliver results to clients at reduced costs. This would be an apt model for small to medium sized projects and ongoing engagements.
- **Offshore Managed Delivery** - Ideally suitable if you have an in-house development team and are simply looking to cost effectively extend/complement your existing development capability, perhaps for new project, while your core team provides business-as-usual support.
